JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Acetonitrile
Mass and microwave spectroscopic studies of the pyrolysis of oxime compounds Part II, 99
Acetonitrile-*N*-oxide
Mass and microwave spectroscopic studies of the pyrolysis of oxime compounds Part II, 99
Activated carbon
FT-IR study of rockrose and of char and activated carbon, 71
Activation
FT-IR study of rockrose and of char and activated carbon, 71
Arundo donax
Thermogravimetric/mass spectrometric characterization of two energy crops, *Arundo donax* and *Miscanthus sinensis*, 179

Biomass
Thermogravimetric/mass spectrometric characterization of two energy crops, *Arundo donax* and *Miscanthus sinensis*, 179

Calcium sulfate
Kinetic and quantitative studies of the formation of SO_2 from iron(II) and calcium sulfates by sequential and fractionated pyrolysis, 37
Cellulose
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137
C function model
Study of the primary pyrolysis of Kraft lignin at high heating rates: yields and kinetics, 159
Char
FT-IR study of rockrose and of char and activated carbon, 71
Chemical reactivity
Characterization of the decomposition course of Cu(II) 3,5-diisopropyl salicylate hydrate and chemical reactivity of the final products — spectrothermal investigation, 17
Chemical vapor deposition
Thermal behavior of vanadocene, 121
Copper chloride
Thermal decomposition of low-density polyethylene in the presence of iron and copper chlorides, 149
Cu(II) 3,5-diisopropyl salicylate hydrate
Characterization of the decomposition course of Cu(II) 3,5-diisopropyl salicylate hydrate and chemical reactivity of the final products — spectrothermal investigation, 17
Curie-point pyrolysis–mass spectrometry
An investigation into the Curie-point pyrolysis–mass spectrometry of glycyl dipeptides, 51

DTA
Thermal behavior of vanadocene, 121

Extractives
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137

Formaldehyde
Mass and microwave spectroscopic studies of the pyrolysis of oxime compounds Part II, 99
Fourier transform-infrared spectroscopy
FT-IR study of rockrose and of char and activated carbon, 71
Thermal decomposition of low-density polyethylene in the presence of iron and copper chlorides, 149
Fractionated pyrolysis
Kinetic and quantitative studies of the formation of SO_2 from iron(II) and calcium sulfates by sequential and fractionated pyrolysis, 37

GC/MS
Pyrolysis–gas chromatography/mass spectrometry used for screening polycyclic aromatic hydrocarbons by desorption from sediment, 27
Glucomannan
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137
Glycyl dipeptides
An investigation into the Curie-point pyrolysis–mass spectrometry of glycyl dipeptides, 51

Iron chloride
Thermal decomposition of low-density polyethylene in the presence of iron and copper chlorides, 149
Iron(II) sulfate
Kinetic and quantitative studies of the formation of SO_2 from iron(II) and calcium sulfates by sequential and fractionated pyrolysis, 37

Kinetics
Pyrolysis of *n*-heptane: kinetics and modeling, 103
Kraft lignin
Study of the primary pyrolysis of Kraft lignin at high heating rates: yields and kinetics, 159

Lignin
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137

Mass spectrometry
Mass and microwave spectroscopic studies of the pyrolysis of oxime compounds Part II, 99
Microwave spectroscopy
Mass and microwave spectroscopic studies of the pyrolysis of oxime compounds Part II, 99
Miscanthus sinensis
Thermogravimetric/mass spectrometric characterization of two energy crops, *Arundo donax* and *Miscanthus sinensis*, 179
Modelling
Modelling of the pyrolysis of wet wood, 81
Molecular reaction scheme
Pyrolysis of *n*-heptane: kinetics and modeling, 103

n-Heptane
Pyrolysis of *n*-heptane: kinetics and modeling, 103

Pinus sylvestris
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137
Polycyclic aromatic hydrocarbons
Pyrolysis–gas chromatography/mass spectrometry used for screening polycyclic aromatic hydrocarbons by desorption from sediment, 27
Polyethylene
Thermal decomposition of low-density polyethylene in the presence of iron and copper chlorides, 149
Thermogravimetric studies on the thermal decomposition of polyethylene, 1
Product distribution
Pyrolysis of *n*-heptane: kinetics and modeling, 103
Pyrolysis
An investigation into the Curie-point pyrolysis–mass spectrometry of glycyl dipeptides, 51
Characterization of the decomposition course of Cu(II) 3,5-diisopropyl salicylate hydrate and chemical reactivity of the final products — spectrothermal investigation, 17
FT-IR study of rockrose and of char and activated carbon, 71
Kinetic and quantitative studies of the formation of SO_2 from iron(II) and calcium sulfates by sequential and fractionated pyrolysis, 37
Mass and microwave spectroscopic studies of the pyrolysis of oxime compounds Part II, 99
Modelling of the pyrolysis of wet wood, 81
Pyrolysis–gas chromatography/mass spectrometry used for screening polycyclic aromatic hydrocarbons by desorption from sediment, 27
Pyrolysis of *n*-heptane: kinetics and modeling, 103
Study of the primary pyrolysis of Kraft lignin at high heating rates: yields and kinetics, 159
Thermogravimetric/mass spectrometric characterization of two energy crops, *Arundo donax* and *Miscanthus sinensis*, 179
Thermogravimetric studies on the thermal decomposition of polyethylene, 1

Pyrolysis–gas chromatography
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137
Pyrolysis–gas chromatography/mass spectrometry
Thermal decomposition of low-density polyethylene in the presence of iron and copper chlorides, 149
Pyrolysis mechanism
Mass and microwave spectroscopic studies of the pyrolysis of oxime compounds Part II, 99

Rockrose
FT-IR study of rockrose and of char and activated carbon, 71

Sediment
Pyrolysis–gas chromatography/mass spectrometry used for screening polycyclic aromatic hydrocarbons by desorption from sediment, 27
Sequential pyrolysis
Kinetic and quantitative studies of the formation of SO_2 from iron(II) and calcium sulfates by sequential and fractionated pyrolysis, 37
Softwood
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137
Spectrothermal investigation
Characterization of the decomposition course of Cu(II) 3,5-diisopropyl salicylate hydrate and chemical reactivity of the final products — spectrothermal investigation, 17
Sulfur dioxide
Kinetic and quantitative studies of the formation of SO_2 from iron(II) and calcium sulfates by sequential and fractionated pyrolysis, 37

Thermal behavior
Thermal behavior of vanadocene, 121
Thermal decomposition
Characterization of the decomposition course of Cu(II) 3,5-diisopropyl salicylate hydrate and chemical reactivity of the final products — spectrothermal investigation, 17
Modelling of the pyrolysis of wet wood, 81
Study of the primary pyrolysis of Kraft lignin at high heating rates: yields and kinetics, 159
Thermal decomposition of low-density polyethylene in the presence of iron and copper chlorides, 149
Thermogravimetric/mass spectrometric characterization of two energy crops, *Arundo donax* and *Miscanthus sinensis*, 179
Thermogravimetric studies on the thermal decomposition of polyethylene, 1
Thermogravimetry
Thermal behavior of vanadocene, 121
Thermogravimetric studies on the thermal decomposition of polyethylene, 1
Thermogravimetry/mass spectrometry
Thermogravimetric/mass spectrometric characterization of two energy crops, *Arundo donax* and *Miscanthus sinensis*, 179

Vanadium carbide
Thermal behavior of vanadocene, 121
Vanadocene
Thermal behavior of vanadocene, 121
Vaporization
Thermal behavior of vanadocene, 121

Wet wood
Modelling of the pyrolysis of wet wood, 81

Xylan
Formation of the main degradation compound groups from wood and its components during pyrolysis, 137
